---

Douglas College CSIS diploma graduate with more than three years of customer service at Globalfer and 10+ years maintaining and repairing personal computers. Combines clear communication with Windows, networking and application troubleshooting. Seeking a first professional IT support role.

EDUCATION

Douglas College | New Westminster, BC

Diploma in Computer Studies & Information Systems | 2024-2026

Relevant coursework: Operating Systems; Virtualization & Computer Networking; Database I/II; Business Communication.

TECHNICAL SKILLS

Systems: Windows, Microsoft 365 basics, Active Directory, Linux, virtual machines, TCP/IP, DNS/DHCP

Hardware: Personal PC diagnostics, BSOD troubleshooting; CPU, GPU, RAM, HDD/SSD and motherboard replacement

Investigation: REST APIs, JSON, SQL Server coursework, MongoDB, application debugging

Tools: Git/GitHub, Docker, Python, Bash, PowerShell; GCP and Terraform coursework

Testing & Documentation: Jest/Supertest, API tests, project READMEs and setup instructions

WORK EXPERIENCE

Globalfer | Brazil

Branch Manager / Operations Coordinator | January 2017-August 2020

- Assisted customers with deliveries, product recommendations and overdue bills; explained options and followed through on requests.
- Coordinated daily branch operations and supervised a small team, working directly with company leadership.

TECHNICAL PROJECTS & COURSEWORK

Globalfer Website | Business Project

Customer requests, business workflows and deployment troubleshooting

- Implemented a website form and WhatsApp quote-request workflow, giving customers another way to contact the business when telephone lines were busy.
- Investigated a Vite/esbuild build failure and verified the application in a clean local clone; checked fixes through tests and a production build.

Cloud Infrastructure & Linux | Coursework

GCP, Terraform, Ubuntu, Apache

- Provisioned a cloud virtual machine and static IP, configured Apache, and load-tested 15,000 requests with 100 concurrent connections.
- Used Python, Bash and PowerShell in cybersecurity scripting exercises on Ubuntu/Kali.

Silent Auction | College / Personal Project

React, Node.js/Express, MongoDB, Firebase, Socket.IO

- Traced frontend, API and database interactions while resolving real-time bidding issues; kept bid validation on the server.
- Tested backend behaviour with assertions, mocks and API-route tests to check fixes and catch regressions.

Languages: English and Portuguese | Available for full-time work and relocation within Canada
